## Le stratifié standard

Il est composé de couches de papiers kraft et d'un papier décor imprégnés de résine thermodurcissable, le tout recouvert d'un film transparent de mélamine assurant solidité et résistance appelé overlay.

C'est un revêtement polyvalent, robuste et hygiénique présentant une bonne résistance aux agressions externes. Il se décline dans des formes qui s'adaptent à vos créations, dans de larges gammes de coloris pour créer les univers les plus tendances.
